Correction of the procedure manual

In "AG23-0038-003E_DA1000_Python_Execution_Environment_Setup_Manual_EN.pdf", in 2.1.4.2. Downloading the package for Ads communication, install the Ads communication package version 6.2.387 instead of 6.0.356.

2.1.4.2. Downloading the package for Ads communication

Launch the command prompt and change the current folder to the folder where the command line version of NuGet is located.

```
C:\Users\(username)>cd C:\NugetCommandlinePackages
```

Enter the following into the command prompt and execute it. The download of the package for Ads communication will begin.

6.2.387

```
C:\NugetCommandlinePackages>nuget.exe install Beckhoff.TwinCAT.Ads -Version 6.0.356
```

Get dll folder

After installation, you will get a folder like the one in the image on the right.

Extracting dll

Among the folders obtained on the previous page, only those that have [Folder name\lib\net6.0] in the folder structure will extract the dlls in the net6.0 folder.

Example: If you want to extract TwinCAT.Ads.dll, extract TwinCAT.Ads.dll from [Beckhoff.TwinCAT.Ads.6.2.387\lib\net6.0].

- Microsoft.Extensions.Configuration.Abstractions.dll
- Microsoft.Extensions.Configuration.Binder.dll
- Microsoft.Extensions.Configuration.dll
- Microsoft.Extensions.DependencyInjection.Abstractions.dll
- Microsoft.Extensions.Logging.Abstractions.dll
- Microsoft.Extensions.Primitives.dll
- System.ComponentModel.Composition.dll
- System.Diagnostics.EventLog.dll
- System.Reactive.dll
- System.Runtime.CompilerServices.Unsafe.dll
- System.ServiceProcess.ServiceController.dll
- TwinCAT.Ads.Abstractions.dll
- TwinCAT.Ads.ConfigurationProviders.dll
- TwinCAT.Ads.dll
- TwinCAT.Ads.Server.dll

Running TestProgram

Move the dll obtained on the previous page into the same folder as the python file you want to run and run TestProgram.
